

# ROADWAY AND STREET IMPROVEMENT MANAGEMENT

CALDROP offers a team of industry professionals with significant experience managing street rehabilitation and improvement projects for local cities and transportation agencies throughout California. Our approach is based on providing value to our clients, and is grounded in the belief that we are the client's eyes and ears in the field. We are careful in our observation, thorough in our documentation, consistent in our enforcement of the contract documents, and fair in our management of the contractor. Our staff recognizes the importance of their role in protecting the client from potential claims, as well as the role of the inspection team in ensuring the overall quality of the project. Our management approach ensures comprehensive construction inspection while also being cost-effective.

The spectrum of work associated with our services includes:

- Roadway Construction and Inspection
- Grading
  - Base / Sub-base
